

A man and a woman are shown from the waist up, embracing each other while riding a bicycle. The man, on the left, is wearing a dark baseball cap, a beard, and a dark olive-green jacket. The woman, on the right, has long blonde hair and is wearing a light grey jacket. They are both smiling and looking towards the right. The background is a bright, sunny outdoor setting with green trees and a clear blue sky. The overall mood is happy and active.

FUNCTIONS & FEATURES

BIONIC-FINISH®ECO

BIONIC-FINISH® was developed, following the example set by nature, 'learning from nature'. The textile is protected against water and dirt by a very thin crystalline structure. BIONIC-FINISH®ECO protects man and nature.

DUPONT™ SORONA®

Sorona® renewably sourced fiber delivers superior performance benefits to today's fashions. Fabrics that use Sorona® are very soft, very strong and dry very quickly. Sorona® helps fabrics stretch comfortably and retain their shape. Moreover, it contains plant-based ingredients. DuPont™ Sorona®. Designed for Performance. Derived from Nature.

SOFTSHELL

Softshell with TPU membrane consists of three layers. Due to the microporous TPU membrane as middle layer the material is water-proof, wind-proof and breathable at the same time.

BREATHABILITY/ PERMEABILITY TO VAPOUR

Functional textiles must have the ability to transport moisture from the skin to the fabric surface as fast as possible. Permeability shows how much steam in grams can evaporate on a surface of 1 m² within 24 hours. The higher this figure, the more breathable the textile is.

WATER COLUMN

The ability to withstand water pressure without moisture penetrating into the material is given by the water column (mm). The minimum standard is a water column of 1,500 mm.
